

TerraLex.org Redesign: Competitive UX/UI Benchmark and Strategic Blueprint for a Global Law-Firm Network Website

Executive summary

TerraLex's public website currently behaves like a "network bulletin + directory" experience: it foregrounds network news, events, cross-border guides, and an app, then routes users to a combined Firms/Professionals directory and practice/industry group pages. ¹ Compared to peer networks, TerraLex already signals scale and credibility ("23,000+ attorneys," "200+ jurisdictions," "120+ countries"), but the conversion paths and audience segmentation are less explicit than many competitors that lead from "Find a firm/lawyer" into a clear directory → firm profile → contact/request flow. ²

From a market positioning standpoint, TerraLex sits among the "elite/global" cohort that directories like Chambers and Legal 500 profile alongside other major networks and alliances, which makes the website's UX/UI (especially search/directory experience, proof-points, and trust messaging) a primary differentiator. ³

The redesign opportunity is to treat the TerraLex site as two tightly connected products:

A public-facing **legal-buyer experience**: - quickly explain "why TerraLex" in 10 seconds (trust + coverage + consistency), - make **Find counsel** the dominant interaction (fast directory with meaningful filters, clear results, strong firm profiles, obvious "request an introduction" CTAs).

A network-facing **membership and collaboration experience**: - clearly explain membership standards/benefits and provide a transparent "join" funnel (some competitors provide structured application flows on the public site), - show proof of collaboration via structured "success stories," events, taskforces, and cross-border guides.

Competitor patterns to borrow (and improve): - **Prominent, purpose-built directories** with direct prompts ("Want to find a lawyer or firm?"; "Find a Firm") and structured global facets. ⁴

- **Membership recruitment as a product** (clear benefits pages and structured application forms) rather than a vague contact page. ⁵

- **Proof points and microcopy that reinforce trust**: "one member per jurisdiction," "invitation-only," response-time commitments, and third-party recognition. ⁶

The recommendations below translate those patterns into a TerraLex-appropriate information architecture, page templates, content modules, conversion funnels, and measurement plan—optimized for US + Europe legal buyers and member firms.

Research approach and baseline audit of current TerraLex site

The work below is based on: (1) a baseline review of current TerraLex public pages (home, directory, practice/industry landing pages, and an example practice group page), and (2) comparative UX/UI analysis across named competitors plus additional major networks surfaced via directory listings (Chambers and Legal 500 network directories). ⁷

Current TerraLex information architecture and key interactions

TerraLex's primary global nav includes: **Find Firms/Professionals, Insights/Cross-Border Guides, Ask myLexi, News, Events, About**, plus a members-only intranet link ("TLC"). ⁸ The homepage emphasis is on network updates (annual report, new cross-border guides, news items, events) and brand promise ("elite global legal network committed to collaboration," scale and geographic claims). ⁸

The directory entry point ("Firms/Professionals") currently instructs users to use a down-arrow toggle to switch between Firms and Professionals, and references "Additional filters," but the extraction suggests the default experience is still list-forward (alphabetical firm cards) with filters not immediately readable in the captured text. ⁹

Practice/industry discovery is separated into the "Practice Groups & Industry Sector Teams" landing with lists of both categories, and the example practice group page shows long-form explanatory copy, bullet lists of services, and a guide CTA ("Access...Guide"), followed by "Group Leaders." ¹⁰

Baseline strengths to preserve

TerraLex already has several strong building blocks that match competitor expectations:

- **Regular network updates and events** (important for member engagement, credibility signals, and SEO freshness). ⁸
- A **directory concept** that includes both firms and people, which many networks treat as separate but complementary discovery paths. ⁹
- **Cross-border guides** as an owned "content product," analogous to toolkits and guides used by peer networks for authority and SEO. ¹¹
- **Network scale claims** comparable to other elite networks competing on coverage and trust. ¹²

Primary gaps revealed by competitive comparison

Based on competitor patterns, TerraLex's redesign should explicitly address:

- **Audience clarity at the top of the funnel:** many competitors make the first decision easy (Find counsel vs Member login vs Join). TerraLex's homepage currently leads with news/guides; "Find Firms/Professionals" is present but not framed as the dominant primary action. ¹³
- **Directory UX depth:** leading peers show richer faceting (region/country/city + practice/industry + people roles) and/or map/list toggles (Interlaw). ¹⁴
- **A public membership funnel:** some competitor networks provide structured membership application flows (Globalaw, Interlaw, ILN). TerraLex's publicly visible pathway appears less explicit (at least in the pages captured here). ⁵

- **SEO-structured landing pages:** competitors that invest in content hubs, resources, and clear practice/industry architecture typically create more crawlable entry points (Lex Mundi, Multilaw “Content Hub,” Ius Laboris insights). ¹⁵

Primary goals and user personas for global law-firm network websites

Across competitor messaging, the dominant “jobs to be done” cluster into: (a) finding trusted counsel quickly across jurisdictions, (b) showcasing trust/quality standards and coverage, (c) enabling cross-border collaboration and referrals, and (d) using content/events as credibility and engagement engines. ¹⁶

Below are eight personas (US + Europe focus) that should shape TerraLex’s information architecture, page templates, and conversion funnels.

Persona: Global General Counsel at a multinational (US-based HQ) - Goals: identify high-quality local counsel across multiple countries; reduce risk selecting unfamiliar firms; get a single point of coordination. - Tasks: search by jurisdiction and practice; compare firms; request an introduction; validate credibility (rankings, case studies). - Success metrics: time to shortlist; successful connection request completion rate; reduction in follow-up questions. - Preferred content: directory filters, firm profiles, “how the network works,” multi-jurisdiction success stories, RFP support.

Persona: EU-based in-house counsel (mid-market, cross-border operations) - Goals: pragmatic, responsive counsel; predictable engagement model; easy pan-EU coverage discovery. - Tasks: find counsel in a specific EU jurisdiction; check language capability; review relevant guides (e.g., regulatory directives). - Success metrics: directory search success; bounce rate on firm profiles; contact conversion. - Preferred content: EU-oriented practice pages, cross-border guides, language/region tags, “response expectations.”

Persona: Member firm partner seeking outbound referrals - Goals: get help for client matters abroad; identify the right counterpart quickly; preserve client trust. - Tasks: search by jurisdiction + specialty; find key contact; share contacts internally; initiate referral. - Success metrics: time-to-contact; share/contact actions; repeat usage of directory. - Preferred content: people directory, “key contact” markers, quick email/vCard/share, referral guidelines.

Persona: Member firm partner seeking inbound opportunities - Goals: be discoverable for inbound matters; show differentiation and credibility; highlight cross-border experience. - Tasks: polish firm profile; publish insights; register for speaking/events; track profile views. - Success metrics: profile completeness rate; inquiry volume; event participation. - Preferred content: editable firm profile modules, success stories, speaking slots, “featured capabilities.”

Persona: Prospective member firm managing partner - Goals: evaluate membership fit; understand standards and commitments; see value and peer quality; apply with confidence. - Tasks: review benefits and requirements; inspect member list/coverage gaps; initiate application; submit references. - Success metrics: application start rate; application completion rate; qualified leads. - Preferred content: membership landing page, standards, governance, fee/commitment summary (as appropriate), transparent timeline.

Persona: Member firm marketing/BD manager - Goals: leverage membership in pitches; source cross-border co-marketing; access brand assets and proof points. - Tasks: download logos/usage guides; find success stories; promote joint content; coordinate events. - Success metrics: asset downloads; co-marketing participation; referral growth proxies. - Preferred content: marketing toolkit, content library, case story templates, partner search.

Persona: Event attendee (partner/associate/NextGen) - Goals: find event details; register; plan travel; know who is attending; access post-event materials. - Tasks: browse calendar; register; add to calendar; view agenda; access slides/recordings. - Success metrics: registration conversion; reduced support queries; post-event content engagement. - Preferred content: event pages with agenda, speakers, FAQs, and on-demand library.

Persona: Client/procurement analyst researching vendors - Goals: validate provider credibility quickly; find evidence of quality standards and coverage. - Tasks: numerical proof points; third-party rankings; governance/standards; diversity/CSR content where relevant. - Success metrics: time on “proof” pages; CTR to directory; request-intro conversion. - Preferred content: “Why TerraLex,” standards, recognition, client stories, and summarized coverage.

Competitor landscape and UX/UI benchmarking

Competitor set and directory validation

The competitor set below includes all networks explicitly requested plus additional major networks surfaced within directory listings (Chambers and Legal 500 network directories). ¹⁷

As a market signal: Chambers’ “Leading Law Firm Networks: The Elite” category lists TerraLex among elite peers such as Lex Mundi, World Law Group, Interlaw, Multilaw, Meritas, TAGLaw, World Services Group, and others. ¹⁸ Legal 500’s networks database similarly profiles many of these networks and provides comparative network counts (member firms, jurisdictions, and additional “leading ranking performer” signals). ¹⁹

Competitor write-ups and tables

Lex Mundi

Lex Mundi’s UX is positioned as an editorial, authority-led network site with a strong “find counsel” prompt (“Want to find a lawyer or firm? Use Lex Directory”) combined with deep IA around “Global Reach,” “Resources,” and “Events.” It reinforces exclusivity and quality via “one member exclusively per jurisdiction” and “membership organization” language, supporting trust and differentiation. The directory’s UI is jurisdiction-forward and designed for immediate search, reinforcing “right now” urgency. ²⁰

Comparison item	Observations
Homepage hero	“Cross-border legal solutions...” and explicit pointer to Lex Directory.
Directory UX (filters, map, search)	Jurisdiction-first global directory; structured regions/ jurisdictions list.

Comparison item	Observations
Practice pages	"Practice Areas" and "Industries" exist under Global Reach.
Insights/blog	Strong "Resources" IA (Thought Leadership, Guides/Toolkits, Insights, Cybersecurity).
Events	Dedicated Events item in main nav.
Membership/join flow	Member-focused IA (Standards, Benefits) plus Member Login; exclusivity ("one member per jurisdiction").
Contact/lead capture	"Contact" in main nav; directory supports find-first behavior.
Primary CTAs	"Lex Directory," "Cross-border," "View" (reports).
Notable microcopy	"Find a top lawyer, anywhere, right now."; "one member exclusively per jurisdiction."
Evidence reviewed includes homepage and Lex Directory. ²⁰	

World Law Group

World Law Group presents a structured, client-facing discovery experience with persistent "Find a Firm" and "Find a Person" patterns in the header across content pages, which reinforces the directory as the core product. Its "About" page leans heavily into an enterprise-friendly value proposition ("experience of working with a single firm") and highlights invitation-only quality standards and response expectations ("respond... within 24 hours"). ²¹

Comparison item	Observations
Homepage hero	(Observed via About/member directory pages) persistent find widgets are the hero-equivalent interaction.
Directory UX (filters, map, search)	"Find a Firm: Jurisdiction or Firm Name" + "Find a Person: Directory"; member firms listed alphabetically with "Download Member Firm List."
Practice pages	Knowledge Center + publications support practice aggregation; site also has "Global Trade Resources."
Insights/blog	Knowledge Center holds articles and recordings; publications/guides called out.
Events	Primary nav includes Events.
Membership/join flow	Sign up/log in for member firms; invitation-only positioning in About.
Contact/lead capture	Sign up/log in persists; directory leads to firm pages; contact mechanisms on firm pages.
Primary CTAs	"Find a Firm," "Directory," "Download Member Firm List."

Comparison item	Observations
Notable microcopy	"experience of working with a single firm"; "invitation-only membership."
Evidence reviewed includes About and Member Firms directory listing.	
21	

Meritas

Meritas's visible public pages in this capture are minimalist and slogan-forward ("world's premier legal network") with strong "find counsel" copy ("finding top-tier legal help effortless"). The pared-down page extraction suggests either a deliberately sparse public layer or heavier client-side rendering not captured here; either way, the copy focuses on buyer-centric ease and responsiveness rather than detailed IA. 22

Comparison item	Observations
Homepage hero	"The world's premier legal network."
Directory UX (filters, map, search)	"Find a firm that fits your needs" framing; details not visible in capture.
Practice pages	Not visible in captured pages.
Insights/blog	Not visible in captured pages.
Events	Not visible in captured pages.
Membership/join flow	Not visible in captured pages; likely present elsewhere or member-facing.
Contact/lead capture	Not visible in captured pages.
Primary CTAs	Implied: "Find a firm."
Notable microcopy	"finding top-tier legal help effortless."
Evidence reviewed includes homepage and Firms page text capture. 22	

Multilaw

Multilaw uses emotionally resonant brand messaging ("An end to distance") paired with immediate structured search controls (country + practice area selectors) above the fold. It blends a modern content strategy ("Views, news and resources," including a "Content Hub") with strong authority cues ("Ranked Elite Network") and a multi-platform strategy (mobile app, in-house counsel community). The firm/lawyer search page in this capture shows "No content found," indicating possible rendering/search-state issues that TerraLex can avoid by ensuring robust SSR/accessible results. 23

Comparison item	Observations
Homepage hero	"An end to distance" + immediate country/practice selectors; "Meet us" CTA.
Directory UX (filters, map, search)	Dedicated Firm/Lawyer search page; map legend; potential empty/error state ("No content found").
Practice pages	Practice areas are a first-class filter on homepage; suggests strong taxonomy.
Insights/blog	"Views, news and resources"; "Content Hub."
Events	Implied via network; not the primary homepage module in capture.
Membership/join flow	"Sign in/Create account"; elite ranking claim supports recruitment.
Contact/lead capture	"Contact us" in footer + email/phone.
Primary CTAs	"Meet us," "See the latest," "Contact us," app download.
Notable microcopy	"trust...to end distance"; "Ranked Elite Network."
Evidence reviewed includes homepage and firm/lawyer search page. ²³	

Globalaw

Globalaw has a well-developed public IA that strongly supports both buyers and prospective members: "Firms" with search and multiple browsing modes ("By Practice Area," "By Industry," "By Region," etc.), "Success stories," plus "Membership" with a structured application form that prompts for detailed firm information, clients, rankings, and commitment. This is one of the clearest examples of treating membership recruitment as a conversion funnel with explicit step modules. ²⁴

Comparison item	Observations
Homepage hero	Quality and relevance emphasized; due diligence and references are explicitly stated.
Directory UX (filters, map, search)	Firm search with region/country/city + practice/industry/country desk filters; clarifies "Supported Jurisdiction" via microcopy.
Practice pages	"By Practice Area" is a dedicated browse mode listing many practice categories.
Insights/blog	"News & Resources" hub combines events, press, news, publications/resources.
Events	Event cards and "All events & webinars."

Comparison item	Observations
Membership/join flow	Full application flow with topic checklist and “Begin application / Resume application.”
Contact/lead capture	“Contact Us” is persistent; membership page includes secretariat email in microcopy.
Primary CTAs	“Find a firm,” “Membership application,” “All news & resources.”
Notable microcopy	“We seek references...”; “Supported Jurisdiction” definition.
Evidence reviewed includes site nav, firm search, membership application, and success stories. ²⁴	

Interlaw

Interlaw makes directory access highly prominent (“Open the directory,” “Global Reach”) and backs trust claims with testimonial content and awards. Its interactive directory supports region/country/city/firms facets and a map/list toggle, plus a people role dropdown (key contact, lawyer, staff). The membership application is a lengthy, explicit form that captures firm size, rankings, referral patterns, and willingness to attend meetings—an unusually transparent depiction of what membership entails, and an excellent benchmark for TerraLex’s prospective-member funnel. ²⁵

Comparison item	Observations
Homepage hero	“Connect to a lawyer” CTA repeated; directory access emphasized.
Directory UX (filters, map, search)	Region/country/city/firms facets; map/list view; people role filters (key contact, etc.).
Practice pages	“Areas of Expertise,” “Special Business Teams,” and “Affinity Groups” in nav.
Insights/blog	“Resources & Briefings” + “Interlaw News/ InterViews.”
Events	Dedicated Events.
Membership/join flow	Public “Apply for membership” form with deep qualification fields and competitor network disclosure.
Contact/lead capture	Multiple contact subpages (general enquiries, become a member, connect to a lawyer).
Primary CTAs	“Connect to a lawyer,” “Open the directory,” “Apply for membership.”

Comparison item	Observations
Notable microcopy	"elite network"; warnings about privilege/confidentiality on site footer.
Evidence reviewed includes homepage, interactive directory, and membership application form. ²⁵	

ALFA International

ALFA's accessible directory pages show a two-track "Attorneys/Firms" directory with extensive filters (location, state, firm, practice area, radius), plus "Printable Member Firm Directory." The site also strongly supports member programming and education (events, compendia, resources) and positions itself as a broad practice network with thematic initiatives. Some top-level pages were blocked in this capture, but the directory UX itself provides a strong benchmark for robust faceted search. ²⁶

Comparison item	Observations
Homepage hero	Not directly captured (some pages blocked); directory pages show the functional core.
Directory UX (filters, map, search)	Large filter surface (location/state/firm/practice area, radius) + Attorneys/Firms toggle + printable directory.
Practice pages	Practice Areas appear as IA category with "View All," plus initiatives.
Insights/blog	"Resources" includes network news and publications.
Events	Upcoming/past events and webinar recordings appear in nav.
Membership/join flow	"Why ALFA"/becoming member pages exist but were blocked; Chambers notes quality processes and evaluation.
Contact/lead capture	"Contact Us" link is persistent in top utility nav.
Primary CTAs	"Member Directory," "Member Login," "Members Area."
Notable microcopy	"member firms are each independent law firms" disclaimer; encourages due diligence.
Evidence reviewed includes member directory page and Chambers overview. ²⁶	

TAGLaw (TAG Alliances)

TAG's directory experience ("Find an Expert") is feature-rich and multi-dimensional: it supports firm vs professional mode, extensive location facets (region/country/state), and an unusually deep industry taxonomy. The public site strongly reflects a multidisciplinary alliance (law, accounting, tax, strategic

partners) and includes a visible member login. However, key membership pages can require JavaScript for full access (including “Apply to Join” redirect in this capture), which is a risk for accessibility/SEO and a useful “what not to do” benchmark for TerraLex. ²⁷

Comparison item	Observations
Homepage hero	“Globally Connected. Locally Respected.” framed as a multidisciplinary alliance.
Directory UX (filters, map, search)	Very deep filters: region/country/state + industry + firm/ professional toggle; member profile pages include “Connect with this Firm” modules.
Practice pages	Specialty groups/Articles act as practice group substitutes.
Insights/blog	“Knowledge Center,” “Member Articles,” “Doing Business Guides,” “Annual Review.”
Events	Extensive event IA (calendar, webinars, international conferences, regional meetings).
Membership/join flow	“Apply to Join” exists but requires JS in this capture.
Contact/lead capture	“Contact Us / Our Team” pages provide phone + protected emails; profiles include contact widgets.
Primary CTAs	“Find an Expert,” “Member Login,” “Apply to Join,” “Read more.”
Notable microcopy	“Utilize our dynamic search tool...”; “If you cannot see the form...” (JS dependency).
Evidence reviewed includes Find an Expert and Contact/Team pages plus application redirect behavior. ²⁸	

WSG (World Services Group)

WSG appears prominently in both Chambers and Legal 500 network listings as a major global network, but its public pages in this capture are largely inaccessible without JavaScript (“You need to enable JavaScript to run this app”), which can create friction for SEO, accessibility tooling, and even basic content extraction—particularly problematic for legal buyers who expect fast, text-first clarity. Where one sees content, the site emphasizes member independence and a large global footprint. ²⁹

Comparison item	Observations
Homepage hero	JS-required in this capture; content not reliably accessible.
Directory UX (filters, map, search)	Member directory appears JS-required; search snippets reference “MEMBER SEARCH.”

Comparison item	Observations
Practice pages	Practice group pages exist but may also be JS-dependent.
Insights/blog	Blog exists but appears JS-dependent. ³⁰
Events	Practice group pages reference annual meetings, but access varies by rendering. ³¹
Membership/join flow	Join page exists but JS-required. ³²
Contact/lead capture	Contact page exists but JS-required. ³³
Primary CTAs	"Member login / member search" patterns inferred from snippets; not reliably visible.
Notable microcopy	"You need to enable JavaScript..." as a hard blocker.
Evidence reviewed includes JS-required page responses and directory/ranking references. ³⁴	

Ally Law

Ally Law's site is editorial and story-based ("Our Value Proposition," "Network News"), while maintaining a clear Member Directory entry point. Its directory page shows a simple, user-friendly filter set (region/country/state/member firm) with a "Clear filters" pattern—coherent and low-friction for legal buyers. The homepage also demonstrates a strong cadence of timely updates (dated items) and a relatively modern "newsroom" style for credibility. ³⁵

Comparison item	Observations
Homepage hero	"We Work Together" + value proposition and spotlight/news.
Directory UX (filters, map, search)	Region/country/state/member firm filters; "Clear filters."
Practice pages	"Services" exists in nav; practice structures not captured in detail.
Insights/blog	Network News and perspectives articles.
Events	Not prominent in captured homepage excerpt; likely exists elsewhere.
Membership/join flow	"Join Us" in nav indicates recruitment funnel.
Contact/lead capture	"Contact Us" in nav; social links; modern cookie controls.
Primary CTAs	"Learn More," "Member Directory," "Join Us."

Comparison item	Observations
Notable microcopy	"deliver local business intelligence... with global depth and reach."
Evidence reviewed includes homepage and member-firms directory page. ³⁵	

ILN (International Lawyers Network)

ILN presents a warm, community-forward brand ("Where lawyers become friends") with explicit scale proof points ("91... law firms," "5,000 lawyers," "67 countries"). It offers a "Find a firm" search experience (country/region facets) and a public "Join" page with structured membership benefit segments. From a conversion standpoint, ILN is notable for making membership recruitment clearly public and pairing it with network stats, which lowers ambiguity for prospective members. ³⁶

Comparison item	Observations
Homepage hero	Community tone + network stats + "Join."
Directory UX (filters, map, search)	"Members search results" + country/region filtering + "Load more results."
Practice pages	Not explicit in core nav capture; likely embedded in member profiles.
Insights/blog	Not prominent in capture; appears more directory/events focused.
Events	Events module included on homepage with dates.
Membership/join flow	Public Join page with numbered benefits sections.
Contact/lead capture	Join CTA acts as lead capture; directory supports contact discovery.
Primary CTAs	"Find a firm," "Join," "More about us."
Notable microcopy	"Become a part of a worldwide resource..."; "Where lawyers become friends."
Evidence reviewed includes homepage, member search, and join page. ³⁶	

First Law International

First Law International positions itself more like a managed service layer ("Fast... in over 100 countries," "Let's connect," "Trusted by more than 1000 businesses") rather than a "member firms directory-first" network brand. Its partners page emphasizes worldwide coverage and a client-centric onboarding rationale (single management point), which is a differentiated model compared with peer networks emphasizing referrals and firm lists. ³⁷

Comparison item	Observations
Homepage hero	Strong CTA (“Let’s connect”) + social proof logos and “Trusted by...” statement.
Directory UX (filters, map, search)	Partner coverage page exists; directory interactions not shown as dominant in capture.
Practice pages	Not prominent in excerpt; positioning is service orchestration.
Insights/blog	Not captured; may exist but not primary.
Events	Not prominent in capture; Chambers mentions conferences and training. ³⁸
Membership/join flow	Not framed as open recruitment; more client-facing service model.
Contact/lead capture	“Let’s connect” primary; trust marks and client logos support conversion.
Primary CTAs	“Let’s connect.”
Notable microcopy	“The Power of One”; “single point of management.”
Evidence reviewed includes homepage, partners page, and Chambers overview. ³⁷	

Eurojuris

Eurojuris is a highly structured, Europe-centered network site with explicit dual CTAs (“Join the Network,” “Find a Law Firm,” “Your Benefits”) and strong navigation depth across chapters, working groups, news, and events/training. The homepage and global navigation include embedded “Search Lawyers / Search Law Firms,” which treats directory search as an always-on capability, while also maintaining a rich community layer (national chapters, young lawyer program, thematic helpdesks). ³⁹

Comparison item	Observations
Homepage hero	“Join,” “Find a Law Firm,” “Your Benefits” repeated; Europe/global positioning.
Directory UX (filters, map, search)	“Search Lawyers / Search Law Firms” + country selection pattern.
Practice pages	Working groups function as practice hubs (employment, IP, M&A, etc.).
Insights/blog	“News & Views” + blog + social feed.
Events	“Events & Training” with event listings and dates.
Membership/join flow	“Become a Member” in About section; join CTA throughout.

Comparison item	Observations
Contact/lead capture	Contact links for international and national chapters; membership path is prominent.
Primary CTAs	"Join the Network," "Find a Law Firm," "Your Benefits."
Notable microcopy	"global vision" framing; emphasis on chapters and "link between all national chapters."
Evidence reviewed includes homepage, network IA page, and Chambers overview. ³⁹	

European Law Firm

European Law Firm is a Europe-centric network with a clear IA ("Law Firms," "Practice Areas," "Legal Guides," "News") and explicit accessibility affordance ("Skip to content"). It offers an on-page filter by country for member law firms and highlights a "one firm per country" policy in its about/history narrative. Content is compact, scannable, and member-relationship driven, with clear contact visibility inside executive board and member sections—useful benchmarks for TerraLex's own Europe-forward narrative and directory filters. ⁴⁰

Comparison item	Observations
Homepage hero	Simple positioning: "A network of dynamic independent law firms."
Directory UX (filters, map, search)	"Our Member Law Firms" section with "Filter by Country."
Practice pages	"Practice Areas" exists as main nav item.
Insights/blog	"News" plus "Legal Guides."
Events	Not prominent in homepage capture; general meetings described on About.
Membership/join flow	Not explicit in captured pages; narrative describes policy and meetings.
Contact/lead capture	"Contact" in nav; leadership cards include direct emails.
Primary CTAs	"Our Law Firms."
Notable microcopy	"one dedicated member firm for each country"; "act as a hub... for US or Asia based clients."
Evidence reviewed includes homepage, About, and Members pages. ⁴¹	

Ius Laboris

Ius Laboris operates like a specialist practice brand (employment/HR law) with a modern editorial layout,

regional newsletters, and a strong insights engine. It combines “member firms around the world” discovery with “Meet our people” and “Find a lawyer” flows, plus rich taxonomy for services (data privacy, immigration & mobility, training, pay transparency, etc.). The site is a strong benchmark for modern content design, frequent updates, and integrated search/discovery for specialists—useful for TerraLex practice pages and cross-border guide structuring. ⁴²

Comparison item	Observations
Homepage hero	Editorial “featured insights” + subscription CTA; modern “Global experts, local teams.”
Directory UX (filters, map, search)	“Member Firms” page includes filters (“more filters”) and “Close to you” discovery.
Practice pages	Services are presented as topical capabilities (pay transparency, internal investigations, etc.).
Insights/blog	Strong insights feed with dates/read-time markers and region tags.
Events	Not central in capture; training and policy group elements exist.
Membership/join flow	Not framed as open recruitment; alliance brand.
Contact/lead capture	Newsletter subscription and “Meet our people” are conversions.
Primary CTAs	“Discover more,” “See our firms,” “Meet our people,” “See all insights.”
Notable microcopy	“Find a lawyer” + “biggest authority” scale claim.
Evidence reviewed includes homepage and member firms directory page plus Chambers overview. ⁴²	

TerraLex (current benchmark)

TerraLex’s site foregrounds network updates (annual report, cross-border guides, news, events) and positions the network as “elite” and collaboration-focused with scale and geographic claims. It offers a combined Firms/Professionals directory and clear practice/industry group lists. The practice group page template is content-heavy and explanatory, which can support SEO but risks scannability if not modularized and if primary CTAs are not consistent (directory vs intro request vs guide download). ¹

Comparison item	Observations
Homepage hero	Annual report + cross-border guides; strong network-scale paragraph; app prompt.
Directory UX (filters, map, search)	Firms/Professionals toggle via down arrow; “Additional filters” shown; list-first presentation.

Comparison item	Observations
Practice pages	Practice Groups & Industry Sector Teams landing, plus individual group pages with long-form copy and “Group Leaders.”
Insights/blog	“News & Insights” and cross-border guides are core.
Events	Events module on homepage.
Membership/join flow	Members-only intranet prominent; public membership path not explicit in captured pages.
Contact/lead capture	Contact page exists; “Ask myLexi” acts as interaction option.
Primary CTAs	“Find Firms/Professionals,” “Cross-Border Guides,” “Ask myLexi,” “View More Events/News.”
Notable microcopy	“elite global legal network committed to collaboration”; specific scale claims.
Evidence reviewed includes homepage, directories, practice landing, and a practice group page. ¹	

Additional major networks from directories worth benchmarking

The following additional networks appear as significant players in directory listings and merit inclusion in TerraLex benchmarking.

SCG Legal ⁴³

SCG Legal's site is strongly conversion-oriented: “Instantly Connect...” is headline-level positioning, with a US footprint callout and a clear promise of immediate access. It also features events and downloadable brochure CTAs, framing the network as both advisory and relationship-driven. The firms and practices pages appear extensive (large indexable lists), suggesting strong SEO surface area for practice taxonomy—useful for TerraLex to emulate with structured hubs. ⁴⁴

Comparison item	Observations
Homepage hero	“Instantly Connect...” + coverage proof point + brochure download CTA.
Directory UX (filters, map, search)	Firms page exists at a stable URL; details in capture emphasize discoverability and breadth.
Practice pages	Full practices index with many categories.
Insights/blog	Not prominent in excerpt; implied via resources/ events.

Comparison item	Observations
Events	Events are a primary homepage module with clear CTAs.
Membership/join flow	Not explicit in capture; Chambers lists network as elite.
Contact/lead capture	Brochure download and event CTAs; likely contact options elsewhere.
Primary CTAs	"download our brochure," "More Info," event registration.
Notable microcopy	"Your solution starts here"; "Instantly Connect..."
Evidence reviewed includes homepage, firms, practices, and Chambers listing context. 44	

The Interlex Group 45

Interlex is positioned as an elite relationship-driven network with prominent proof points (firms/countries/cities). Its directory is straightforward and region-structured ("Region » Europe"), supporting search by country/city/firm name with expandable "View Firm Information." This is a strong "simple directory" benchmark: low-friction, text-forward, and browseable by region—useful for TerraLex's US+Europe pathways. 46

Comparison item	Observations
Homepage hero	Proof-point counts and positioning ("elite network... strong personal relationships").
Directory UX (filters, map, search)	Search-by-type + region browsing with country grouping; "View Firm Information" pattern.
Practice pages	Not prominent; likely firm-level.
Insights/blog	"News" exists in nav; limited evidence of content hub.
Events	Not prominent in nav.
Membership/join flow	Member login exists; recruitment not obvious in capture.
Contact/lead capture	Contact Us in nav; directory drives firm exploration.
Primary CTAs	"Find a Firm," "Member Login."
Notable microcopy	"Strong personal relationships set us apart."
Evidence reviewed includes homepage, directory page, and Chambers regional overview. 46	

Legalink ⁴⁷

Legalink's homepage in this capture focuses on a concise global description and a "More about" CTA, but member counts display as zeros in the extracted view—likely a rendering/data-binding issue. The member firms page shows a client-side "Loading..." state plus a firm list, suggesting a partially dynamic directory. This illustrates a common directory risk: if filters and counts are not server-rendered cleanly, it can degrade perceived credibility and SEO. ⁴⁸

Comparison item	Observations
Homepage hero	Concise "International legal Network..." statement; numerical widgets appear but render as 0 in capture.
Directory UX (filters, map, search)	Members page shows filter UI and "Loading..." placeholders, plus firm list.
Practice pages	Not observed.
Insights/blog	Not observed.
Events	Not observed in capture; Chambers mentions academy/events. ⁴⁹
Membership/join flow	Not observed; Chambers provides quality narrative.
Contact/lead capture	Not clearly visible in capture.
Primary CTAs	"More about Legalink," member list exploration.
Notable microcopy	"Loading..." and zero-count widgets (potential trust issue).
Evidence reviewed includes homepage, members page, and Chambers review. ⁴⁸	

LEXWORK International ⁵⁰

LEXWORK's site is highly simplified and "referral network"-forward, using icon cards to communicate value (personal service, quality, global reach). The about page explicitly emphasizes rapid referral responsiveness (quick responses to referral emails) and meeting-driven relationships. It also includes explicit "Accessibility" and "Privacy & Cookies" links, signaling governance awareness. ⁵¹

Comparison item	Observations
Homepage hero	Icon-based value proposition; low-clutter presentation.
Directory UX (filters, map, search)	Member list exists (not captured here); site emphasizes referrals/contacts.
Practice pages	Not prominent; likely secondary.
Insights/blog	Not prominent.

Comparison item	Observations
Events	Annual meetings emphasized in About narrative.
Membership/join flow	Membership info link is present; recruitment implied.
Contact/lead capture	Contact link present; conversion seems referral-driven.
Primary CTAs	"Find out more >" on value cards; membership link.
Notable microcopy	"quick response" to referral requests; emphasis on meetings.
Evidence reviewed includes homepage, about page, and Chambers review context. ⁵¹	

Mackrell International ⁵²

Mackrell's site combines network marketing with events prominence (AGM and regional meetings presented as major modules) and a directory designed for multiple discovery modes—country/name list, downloadable PDF, and a firm map. This tri-modal directory is a strong benchmark for TerraLex: it supports both quick browsing and "offline" procurement/shortlisting workflows via PDFs. ⁵³

Comparison item	Observations
Homepage hero	Event-forward (AGM and regional meetings highlighted).
Directory UX (filters, map, search)	"Firms by country and name," "Download members list as PDF," "Firm Map."
Practice pages	Not prominent in capture; likely firm-level.
Insights/blog	Not visible in captured excerpt.
Events	Central to homepage merchandising.
Membership/join flow	Not observed; Chambers provides network narrative and longevity. ⁵⁴
Contact/lead capture	Not visible in excerpt; likely in global nav.
Primary CTAs	Members list PDF, firm map, event promos.
Notable microcopy	Directory tri-modal navigation.
Evidence reviewed includes homepage and member law firms directory page plus Chambers overview. ⁵³	

Lawyers Associated Worldwide ⁵⁵

LAW's site is directory-forward ("Member Directory") with a public "Find a Firm" page that lists firms in a standardized card format (address, phone, email). The homepage includes counters (jurisdictions, firms, lawyers), but shows zeros in capture—again suggesting data-binding issues similar to Legalink. The "Find a Firm" experience itself is strong and usable: scannable, contact-first, and procurement-friendly. ⁵⁶

Comparison item	Observations
Homepage hero	"Local Knowledge. Global Reach." + member directory CTA; counters render as 0 in capture.
Directory UX (filters, map, search)	Public "Find a Firm" listing format with direct contact details.
Practice pages	Not observed.
Insights/blog	Not observed.
Events	Not observed.
Membership/join flow	Not observed; Chambers provides invitation-only and quality narrative. ⁵⁷
Contact/lead capture	Directory itself is lead capture (emails/phones visible).
Primary CTAs	"Member Directory," "Find a Firm."
Notable microcopy	"Local Knowledge. Global Reach."
Evidence reviewed includes homepage, Find a Firm listing, and Chambers overview. ⁵⁶	

International Business Law Consortium ⁵⁸

IBLC's site is "directory as the product." It provides a member list by firm/city and also a representative-by-expertise view—effectively a two-sided directory (firms + subject matter contacts). This is a valuable pattern for TerraLex: a practice-driven "find an expert" mode can complement jurisdiction search for legal buyers and referral partners, especially in US+Europe cross-border matters. ⁵⁹

Comparison item	Observations
Homepage hero	Simple value tagline ("Trust and Growth").
Directory UX (filters, map, search)	Members list by firm/city and a dedicated "representatives by expertise" directory view.
Practice pages	"Representatives by expertise" acts as practice-based discovery.
Insights/blog	Not prominent in capture.
Events	Not prominent in capture.

Comparison item	Observations
Membership/join flow	Not prominent; Chambers describes cross-border capabilities. ⁶⁰
Contact/lead capture	Directory pages drive contact discovery through member detail pages.
Primary CTAs	Member directory browsing; expertise directory as find tool.
Notable microcopy	Directory-oriented language; emphasis on trusted contacts.
Evidence reviewed includes homepage, members list, reps-by-expertise page, and Chambers review. ⁵⁹	

The Law Firm Network ⁶¹

The Law Firm Network presents a classic network IA: success stories, conferences/initiatives, knowledge (magazines/podcasts/guides), and news, with member browsing by “All Members,” “Lawyers,” “Regional Groups,” and “Practice Groups.” Its footer copy includes a clean independence disclaimer—useful microcopy for TerraLex to standardize across profiles and referral flows. ⁶²

Comparison item	Observations
Homepage hero	Not captured; members page shows site sections clearly.
Directory UX (filters, map, search)	Multiple member browse modes including lawyers and practice groups; site search present.
Practice pages	“Practice Groups” exist as a member navigation mode.
Insights/blog	“Knowledge” section includes magazines/podcasts/guides.
Events	Conferences & initiatives have dedicated IA.
Membership/join flow	Not obvious in capture; likely exists via contact/intranet.
Contact/lead capture	Contact CTA present with executive director info.
Primary CTAs	“Our Members,” “Conferences,” “Knowledge,” “Contact.”
Notable microcopy	Independence disclaimer repeated; professional tone.

Comparison item	Observations
Evidence reviewed includes members page and directory context sources. ⁶²	

Association of European Lawyers ⁶³

In Chambers' Europe Law Firm Networks context, the Association of European Lawyers appears as a top-band European network with a stated member-firm count and descriptions focused on pan-European coverage and member training/seminars. This is a relevant comparator for TerraLex's Europe-facing messaging and for region-specific landing pages, even if TerraLex remains global. ⁶⁴

Comparison item	Observations
Homepage hero	Not captured directly here; directory sources position it as a leading European network.
Directory UX (filters, map, search)	Not captured here.
Practice pages	Not captured here.
Insights/blog	Not captured here.
Events	Chambers notes training/seminars as key activity. ⁶⁵
Membership/join flow	Not captured here.
Contact/lead capture	Not captured here.
Primary CTAs	Not captured here.
Notable microcopy	Directory-style positioning around European network leadership.
Evidence reviewed includes Chambers Europe networks PDF context and Legal 500 networks listing. ⁶⁴	

ADVOC ⁶⁶

ADVOC is referenced in directory contexts as a global alliance with Chambers-recognized quality controls and peer review. In this capture, the ADVOC website returned gateway errors (502), limiting direct UX/UI benchmarking; however, its inclusion as a ranked network suggests it should remain on TerraLex's competitive radar for directory UX and membership messaging once accessible for a full audit. ⁶⁷

Comparison item	Observations
Homepage hero	Not accessible in this capture (502). ⁶⁸
Directory UX (filters, map, search)	Not accessible in this capture.

Comparison item	Observations
Practice pages	Not accessible in this capture.
Insights/blog	Not accessible in this capture.
Events	Not accessible in this capture.
Membership/join flow	Not accessible; Chambers describes vetting/peer review. ⁶⁹
Contact/lead capture	Not accessible in this capture.
Primary CTAs	Not accessible in this capture.
Notable microcopy	Not accessible in this capture.
Evidence reviewed includes site access behavior, Chambers overview, and Legal 500 networks listing. ⁶⁷	

Recommended TerraLex website architecture, templates, modules, funnels, and wireframes

The architecture below assumes no budget/tech constraints and treats TerraLex as a dual-audience web product (legal buyers + member/prospective member firms). It also assumes TerraLex wants to outperform competitors on directory usability, credibility, and conversion clarity (a pattern consistently emphasized by peers). ⁷⁰

Proposed sitemap and navigation model

Key principle: Make **Find Counsel** the primary top-nav action, with persistent access to directory search; separate community/member content from buyer content without burying it.

Page templates and reusable content modules

Global modules (sitewide) - Header with global search (Directory-first search), plus persistent CTA: "Request an introduction." - Utility nav for members: "Member Portal," "Member Resources," "Sign in." - Footer with: independence disclaimer, privacy/cookies, contact, and "Coverage" summary.

Homepage modules - Hero with 1-sentence value prop + two CTAs: "Find counsel" and "Request an introduction." - Proof points row: coverage metrics (jurisdictions/countries/member firms) and third-party recognition callout. - Fast directory search module (jurisdiction + practice + keyword). - "How TerraLex works" (3-step). - Featured success stories (short, quantified). - Featured guides + insights (fresh dates). - Events preview + on-demand library teaser.

Directory results modules - Search bar (sticky) + filter drawer (mobile) and left filter rail (desktop). - Results: firm cards with key metadata (jurisdictions served, key contacts, languages, core practices, rankings badges if provided). - Map toggle optional; if included, keep it secondary (Interlaw-style toggle) but ensure list is always accessible. ⁷¹ - Save/share actions and internal referrer workflow (for members) as optional enhanced functionality.

Firm profile modules - Above the fold: firm name + location(s), key contacts, languages, practice strengths, "Request intro" CTA. - Coverage: jurisdictions served and supported jurisdictions when relevant (borrow Globalaw's clarity pattern). ⁷² - Proof: representative matters (anonymized), directory/ranking badges if permissible, collaboration stories. - Content: latest insights (from firm) and TerraLex guides tagged. - Contact: request form with reason selection (new matter / referral / media / membership / event).

Practice area page modules - "What we do" overview + scannable offering blocks (avoid long uninterrupted bullet lists). - "Find counsel in this practice" search shortcut. - Featured guide/toolkit. - Latest insights tagged. - Practice leaders + contact.

Membership landing modules - Value proposition for prospective firms. - "What's required" (standards, one-firm-per-jurisdiction policy if applicable, participation expectations). - Benefits (referrals, visibility, events, innovation, client introductions). - Stories from members. - Clear CTA: "Start application" or "Schedule an intro call," with a multi-step form similar in clarity to Globalaw/Interlaw. ⁷³

Prioritized feature list and conversion funnels

Tier 1 (must ship for the redesign to "win") - Rebuilt directory search UX: jurisdiction + city + practice + industry + language + "key contact" filters; high-quality firm profiles; fast performance. - A public, explicit "Request an introduction" flow (buyers and referrers). - Membership landing + application/interest workflow with clear steps. - Modular practice and industry hubs with directory shortcuts. - Consistent CTAs and messaging hierarchy across site.

Tier 2 (high leverage) - Content tagging system across guides, news, events, practices, industries. - "Success stories" library with filters (practice/region/industry). - Event registration UX improvements and on-demand library. - Member marketing toolkit (public teaser + gated full toolkit).

Tier 3 (competitive edge) - Personalized experiences: "in-house counsel" hub, saved searches, alerts. - Integrated knowledge assistant experience (evolve "Ask myLexi" into guided tasks: find counsel, build shortlist, request intro). ⁸ - API-first directory to support mobile app and partner integrations.

Wireframe-level page outlines

Homepage (wireframe outline) - Header: Logo; primary nav; global search; CTAs: “Find counsel” (primary), “Member portal” (utility), “Request an introduction” (persistent). - Hero: Value prop + proof point + 2 CTAs. - Quick search: jurisdiction dropdown + practice dropdown + keyword + submit. - “How TerraLex works” (3 tiles). - Featured firms/regions: “US,” “UK,” “Germany,” “France,” etc. (region hub shortcuts). - Featured guide(s) + featured success story. - Insights grid (latest 3–6) with practice tags. - Events preview (next 2–3) + on-demand link. - Footer: disclaimer; contact; privacy/cookies.

Directory results - Sticky search bar + breadcrumb. - Filter rail/drawer: jurisdiction/country/city, practice, industry, languages, firm size band (optional), “key contact” toggle. - Results list cards: firm name, locations, 2–3 practice tags, key contacts, languages, “Request intro” button. - Optional map toggle (secondary). - Pagination or infinite scroll with clear load states.

Firm profile - Hero: firm name + jurisdiction(s) + key contacts + “Request intro.” - Quick facts: languages, offices, practice strengths, sectors. - “Why this firm” (3 bullets) + trust signals. - Cross-border experience (case story cards). - Insights from firm + related TerraLex guides. - Contact module: form + direct email/phone (where appropriate).

Practice area page - Hero: practice name + one-sentence positioning + “Find counsel” button. - “Typical matters” module (scannable). - “Find firms” embedded search pre-filtered. - Practice leaders module. - Guide/toolkit module. - Related insights + related events/webinars.

Membership landing - Hero: “Join TerraLex” + value prop + CTA. - “Who we’re for” (one firm per jurisdiction approach and quality expectation; mirror competitor clarity). ⁷⁴ - Benefits grid. - Participation expectations. - Member stories. - “Start application” module (step preview). - FAQ + contact.

Copywriting, visual design, accessibility/performance targets, SEO strategy, analytics, and experimentation

Copywriting guidelines

Competitors consistently rely on a small number of high-trust messaging patterns: “elite,” “invitation-only,” “one firm per jurisdiction,” “fast response,” “seamless cross-border,” and quantified proof points. ⁷⁵ TerraLex should adopt a messaging hierarchy that is explicit, scannable, and audience-specific.

Tone - Confident, precise, and buyer-facing; avoid overly abstract statements without proof. - Favor operational credibility (“how we work,” “how you request an introduction”) over promotional adjectives.

Messaging hierarchy (homepage) 1. Outcome: “Trusted cross-border counsel through one global network.” 2. Proof: coverage metrics + vetting/standards + third-party recognition. 3. Mechanism: “Search the directory” + “Request an introduction.” 4. Depth: guides, success stories, events.

Headline examples - “Find trusted local counsel—anywhere your business operates.” - “One network. Carefully vetted independent firms. Coordinated cross-border execution.” - “Request an introduction within the network—fast, responsive, and accountable.”

CTA system - Primary: “Find counsel” / “Search directory” - Secondary: “Request an introduction” - Supporting: “Browse guides,” “View upcoming events,” “Explore success stories,” “Join TerraLex”

Visual design recommendations

TerraLex competes in a high-trust segment. Most competitors use conservative, corporate design systems with strong typography and a global/relationship motif (maps, people, meeting imagery). ⁷⁶ A redesigned TerraLex should signal: global scale + modern operational excellence + human collaboration.

Style direction - “Modern editorial + enterprise trust”: clean grids, generous whitespace, strong typographic hierarchy, restrained motion. - Use imagery that shows cross-border collaboration (teams, meetings, cities) rather than generic courthouse stock.

Typography - Use a modern serif for headlines paired with a highly legible sans for body text (or a single variable family with strong weights). - Prioritize readability for long guides and practice pages.

Color palette - Base: deep navy/charcoal + off-white backgrounds for seriousness. - Accent: one warm accent (e.g., copper) for CTAs; one cool accent (teal) for interactive states. - Ensure accessible contrast ratios as part of the design system. ⁷⁷

Accessibility and performance targets

Accessibility target - Conform to WCAG 2.2 Level AA as the explicit target. ⁷⁷

- Avoid treating AAA as a blanket requirement for the entire site (WAI notes this is not generally recommended for entire sites). ⁷⁸

- “No hard JS blockers” for core pages (directory, profiles, membership landing). Competitors that return “You need to enable JavaScript...” highlight a real risk for both accessibility and discoverability. ⁷⁹

Performance target - Achieve “good” Core Web Vitals on key page types (home, directory results, firm profile, practice page, guide detail) and monitor using field data. ⁸⁰

SEO and content strategy

TerraLex’s strongest SEO surface area should be the **directory and taxonomy hubs** (practice/industry) plus guides and insights. Competitors that invest in clear IA and “resource hubs” create large, indexable surfaces that match how legal buyers search. ⁸¹

Key indexable page types - Practice area hub pages (unique, non-duplicative copy; embedded directory search). - Industry hub pages. - Jurisdiction landing pages (US states + EU countries as primary). - Firm profile pages (canonical URLs; structured data). - Cross-border guide library + guide detail pages. - Success stories (filterable).

Structured data - Implement Organization schema on the homepage to help search engines understand administrative details and disambiguate the organization. ⁸²

- Use structured data principles aligned with Google’s guidance (keep parity with on-page content; JSON-LD preferred). ⁸³

- Add a WebSite search action where appropriate, using Schema.org SearchAction concepts to support sitelinks search behavior. ⁸⁴

Multilingual and multi-regional considerations - If TerraLex serves localized versions (or region landing pages), use hreflang annotations to help search engines understand localized page variations. ⁸⁵

- Use x-default hreflang for global selector/landing pages where appropriate. ⁸⁶

Analytics, KPIs, and A/B test program

Competitor patterns show that directory use, membership flows, and event engagement are core value drivers; TerraLex should instrument these as first-class metrics. ⁸⁷

Core KPIs - Directory search success: searches/session, filter usage, zero-result rate, result-to-profile CTR, profile-to-contact CTR. - Lead gen: introduction request conversion rate; form completion rate; time-to-complete. - Content: guide downloads/views; repeat engagement; newsletter subscriptions (if implemented). - Events: event page → registration conversion; attendance; on-demand consumption. - Membership: membership landing engagement; application start/completion; qualification rate.

A/B test ideas - Homepage hero: “Find counsel” vs “Request introduction” as primary CTA; measure directory engagement and lead conversion. - Directory results layout: firm cards with key contact visible vs hidden; measure profile CTR and contact conversions. - Practice page template: scannable module layout vs narrative-first; measure directory shortcut engagement and time-on-page. - Membership landing: short form (request conversation) vs long form (start application); measure qualified lead rate and completion. - Trust proof placement: rankings/standards above-the-fold vs mid-page; measure contact conversion and bounce.

Sources and link notes

This report prioritizes primary/official sources: competitor sites and directory listings (Chambers and Legal 500), plus official standards documentation for accessibility and international/structured SEO. ⁸⁸
